

K LINE

K LINE is an essential and functional solution of design that satisfies the most common requirements for the shelf supports.

K LINE has been developed with a highly captivating and elegant shape so that it can be used as a shelf support for both wood shelves and glass shelves, in the latter case simply by applying a bespoke layer of rubber.

A version of **K LINE** with a vertical pin of $\varnothing 5$ mm has been also developed in order to lock the shelf horizontally.

In any case, all the versions of **K LINE** respect the European regulation UNI EN 14749
